AFRICA CLIMATE BAND CAMPAIGN

FOR IMMEDIATE RELEASE – DUBAI – UAE – DECEMBER 4, 2023

After four events in November, in Côte d'Ivoire, Ghana, Togo and Benin, we are delighted to announce our final event of 2023:

Friday December 8th, 15:30 to 16:30, COP 28 Blue Zone, B7/90, Climate Live Pavillion.

Our event includes a press conference and a musical performance.

This event features:

Press Conference: **Apollinaire Oussou Lio**, Environmental Protector, Prince and Minister of the King of Tolinou, President of GRABE-BENIN; **Alex Carlin**, Foreign Correspondent on Environment, Center for Media and Democracy; **Eric Houdo**, ODD TV; **Sena Alouka**, JVE Togo

Musical Performance: Alex Carlin, Jesse David, Nany Vaz, and more TBA.

This campaign is focused on powerful solutions to the climate problems. We understand, because we have today already one trillion extra tons of CO₂ in the atmosphere, and because it takes thousands of years for that lethal amount to go away by itself, that therefore we must prioritize the removal of that CO₂. We have identified nature-based ocean restoration as an effective way to accomplish this.

We also prioritize indigenous knowledge and practices for maintaining good living conditions while we continue to remove that CO₂. Agro-ecology is a good example of this.

Our anthem, “AFRICA WILL BE THE LEADER” is driving our movement. In 2024 we will release the anthem-video with African stars singing cameo lines, similar to the WE ARE THE WORLD video. The resulting public pressure will speed up the implementation of climate solutions.

To hear the anthem, and for much more about the campaign, please go to www.climate.band

For any request contact: Innocent Antoine Houedji, Coordinator of Youth Initiative for Land in Africa (YILAA) - ahouedji@yilaa.org
